ABSTRACTED-PUB-NO: FR 2724663 A1  
BASIC-ABSTRACT:

Process for enriching argan oil in unsaponifiable components comprises: (i) subjecting virgin argan oil to molecular distn. to obtain a distillate enriched in unsaponifiable components and free fatty acids; and (ii) purifying with steam to eliminate the fatty acids. Also claimed is an enriched Argan oil obtd. by the above process.

USE - The enriched oil can be used in cosmetic compsns. in an amt. of 0.5-3 wt.% (claimed) to prevent skin from aging and drying out.

ADVANTAGE - The concn. in unsaponifiable components (including carotenes, tocopherols, methylsterols, triterpene alcohols and xanthophylls) can be increased to 3-5 (pref. to 3.8) wt.% without affecting the appearance or odour of the oil.
